L. Enrique Sucar , Duncan F. Gillies

Proceedings of the third international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 2 June 1990

Endoscopy is a complex task in which an expert physician is required to guide the endoscope inside the human colon. The objective of this system is to develop a computer assistant that could help the doctor with the navigation of the endoscope inside the colon, serving as an advisory system for learning endoscopists. A knowledge-base (KB) in colon endoscopy has been compiled from the knowledge extracted from an expert colonoscopist. It includes knowledge for colon image interpret ...

2 Achieving color uniformity across multi-projector displays 77%

Aditi Majumder , Zhu He , Herman Towles , Greg Welch

Proceedings of the conference on Visualization '00 October 2000
